Product Description

ZDJ-240DS fully automatic sheet-feeding paper bag making machine, is suitable for the mass bag production, it is the first choice of medium and top grade handbag device. This product adopts mechanical, electricity, light, gas integration technology is, combine a number of its proprietary technology, uses the paper as raw material canle finish: paper feeding positioning, die-cutting tube forming, gusset forming bottom opening, bottom cardboard inserting and bottom gluing automatic, Seamless viscose(hot melt adhesive), then compaction output adopt the PLC programmable control frequency control technology to realize the integral multidimensional control, more centralized control and single point remote control operating. Our product is character by good quality and high efficiency, its technology ranks leading level in domestic similar products.

DATA			
Size L*W*H	13800mm*2200mm*1800mm	Weight	9T
Min. Paper Sheet Size	210mm*325mm	Power	12kw
Max. Paper Sheet Size	410mm*750mm	Gusset	40mm - 140mm
Bag Width	100mm - 240mm	Paper Weight	80g-190g
Bag Height		Speed	50-110pcs/min
